-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election***

1. Applicant's election without traverse of Embodiment 3, claims 1-7,18-24,32-34,71-76,79-85 and 88-90 readable thereon, in the Paper filed 08/18/05 is acknowledged.

### ***Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 79-85 and 88-90, drawn to a method, classified in class 359, subclass 494.
- II. Claims 1-7,18-24,32-34, and 71-76, drawn to a device, classified in class 257, subclass 98.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case unpatentability of the Group I process invention would not necessarily imply unpatentability of the Group II product invention, because the Group I process invention could be practiced with another materially

Art Unit: 2826

different product from that of the Group II invention. For example, the process of claim 79 could be practiced with a product including a bulk (non-epitaxial) structure comprising an active region configured to emit light that is less than 50% polarized when forward biased, a product materially different from the products of claims 1 or 18.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
